What do we mean by “footsteps?”

The courts have set the standard that the retracing surveyor of today must follow the footsteps that were left yesterday.

What do the courts mean?

These are foot steps.

Footsteps come in all sizes and shapes, the secret is when you see one; will you recognize it. Let’s look at some footsteps. Do you recognize any of them?

Black states “footsteps(prints)” are

- “In the law of evidence impressions made upon the earth, snow or other surface by the feet of persons, or by the shoes, boots, or other covering of the feet.”

# Are any familiar?

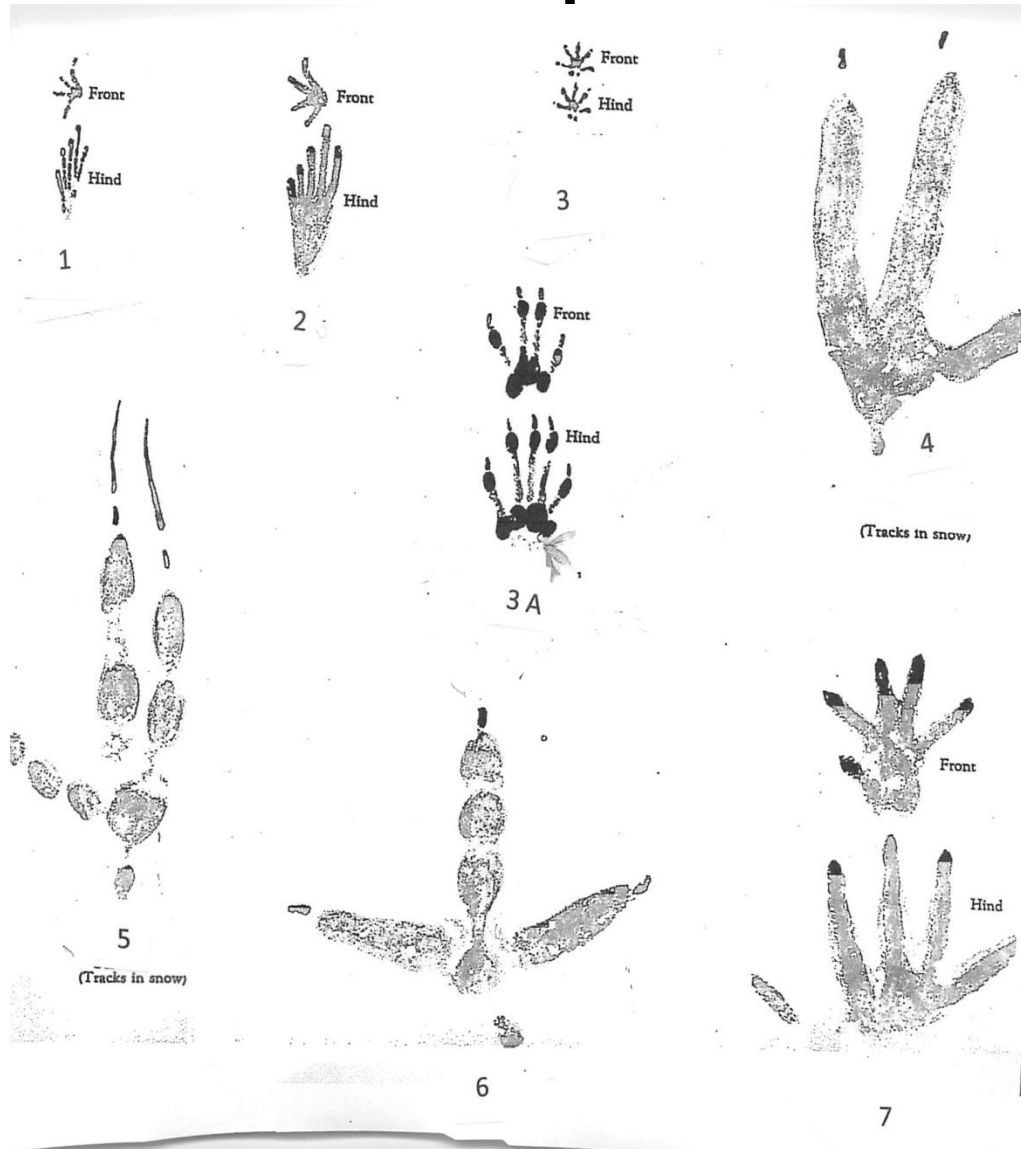

Identify any you can. A prize for the best guesser.

We are going to show you some footprints;

Identify them, by writing what “animal” made these footprints under the number

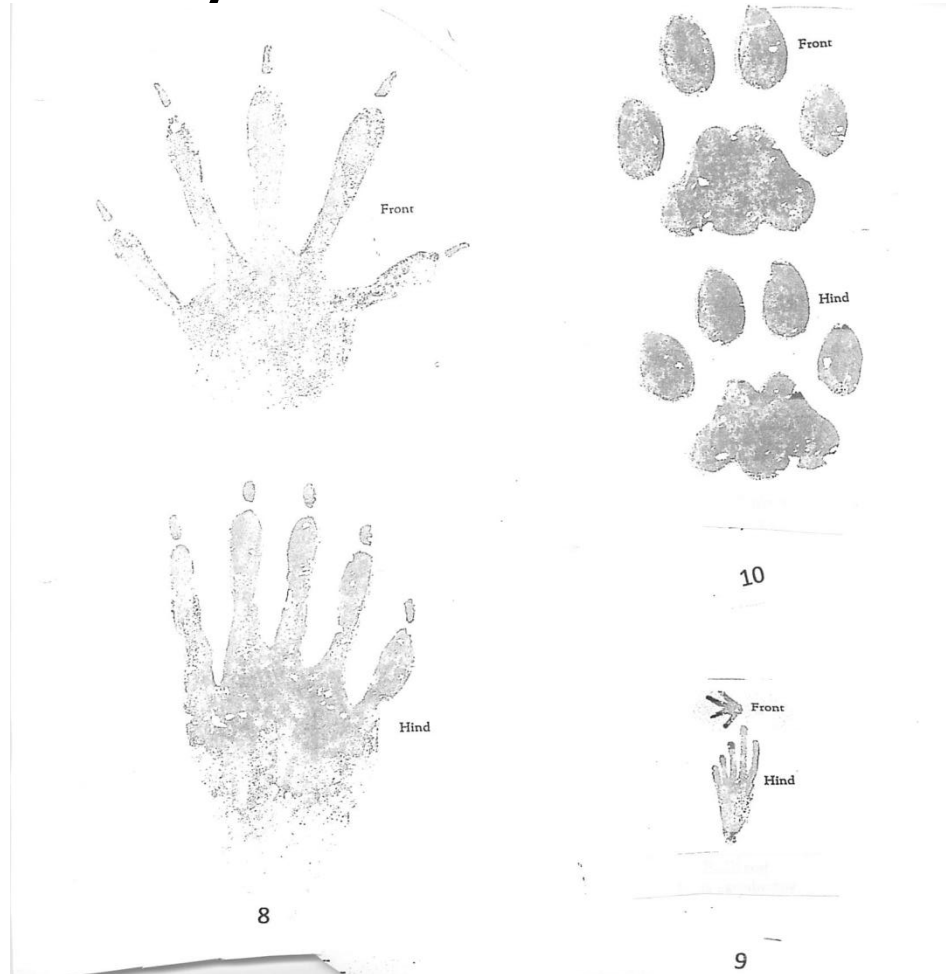

- A **prize** will be awarded to the person/s who identified the greatest number.

# Footsteps 1

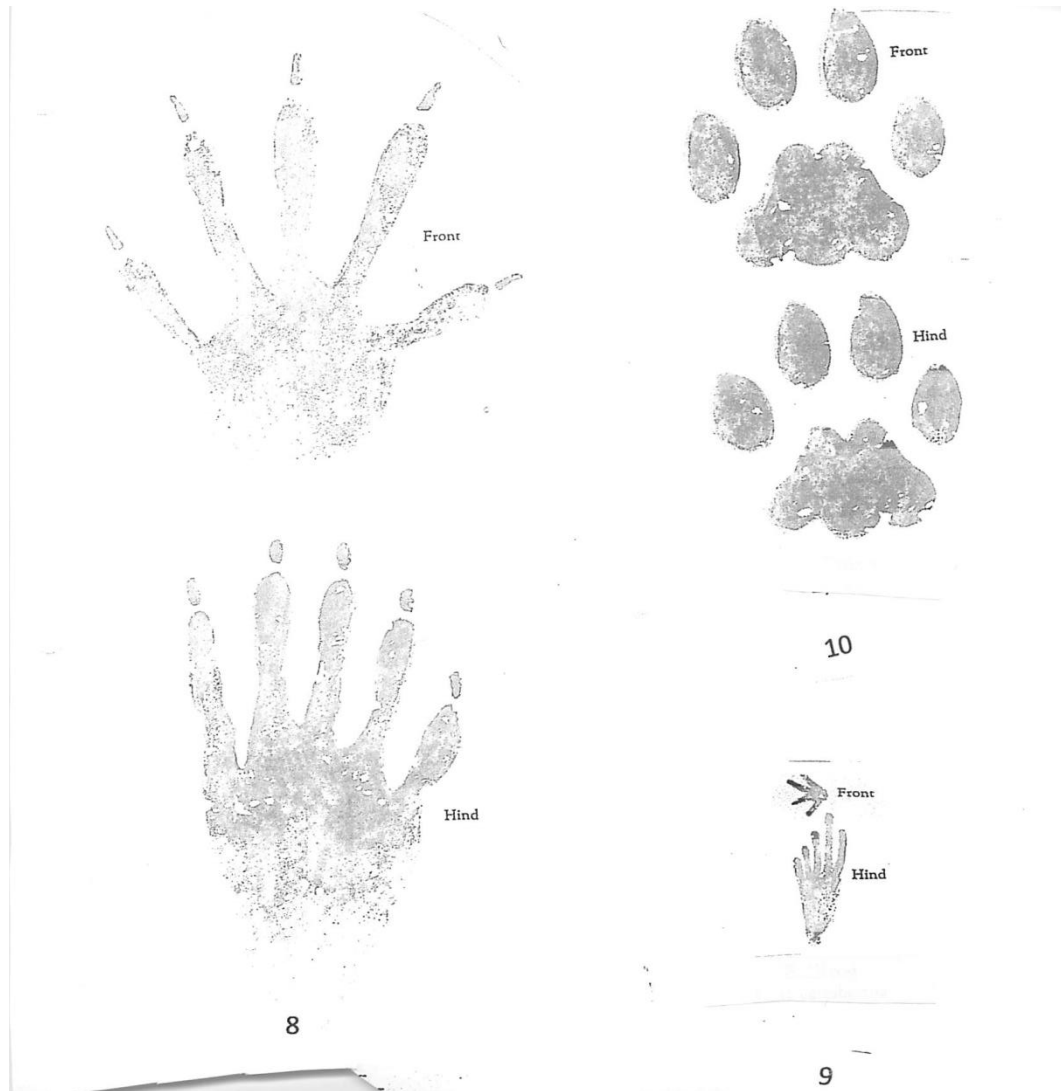

2

If you are so smart  
Let's try some more

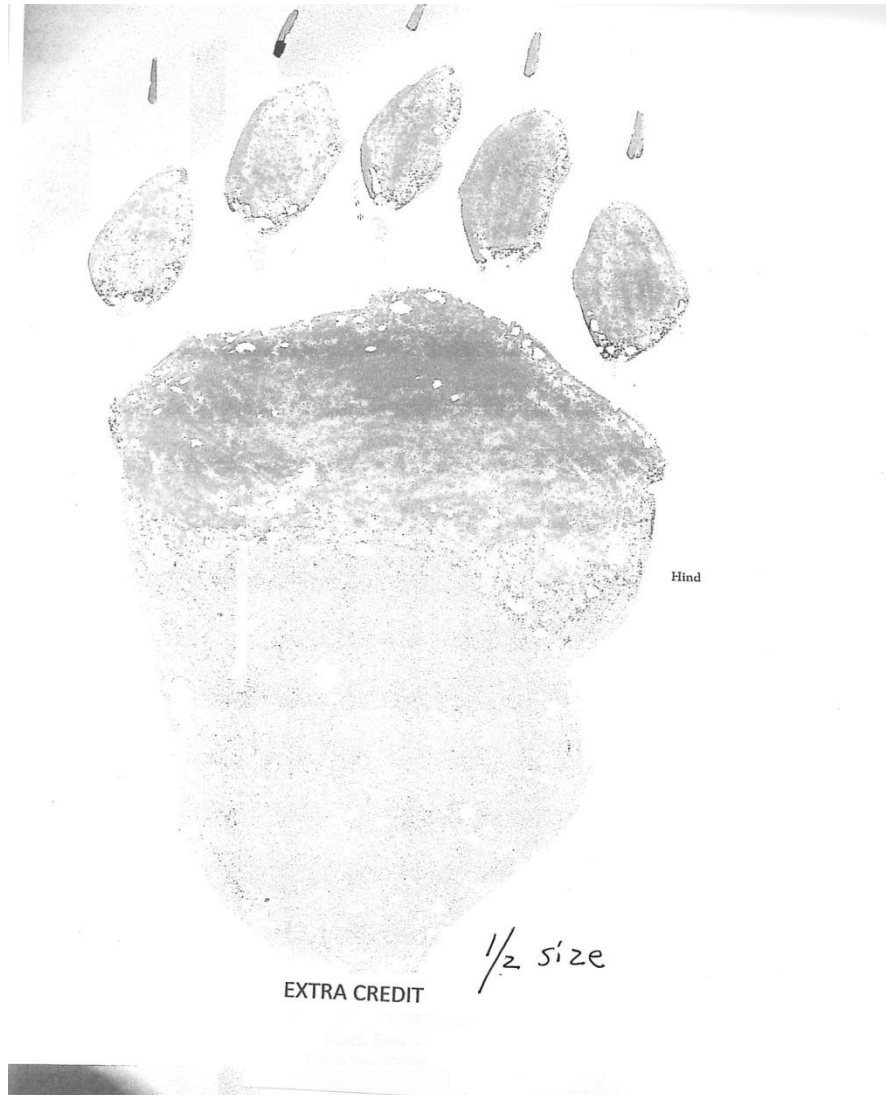

3

These are easy

# This should be easy

# Now here are the answers

- 1. Leopard Frog
- 2. Bullfrog
- 3. Vole
- 3A. squirrel
- 4. Owl
- 5. owl, barred
- 6. ruffed grouse

# And more

- 7. muskrat
- 8. raccoon
- 9. bullfrog
- 10. bobcat
- 10a. Rabbit
- Extra credit bear
- 11. Deer If you missed this-leave the room.
